Mode of Attendance

Student ID:

Name:

Commencing: Semester 1, 2023 Winter Session, 2023

The Graduate Certificate of Science Communication (CRICOS code: 103862H) can be completed fully in person or fully online. The program is CRICOS registered for international students who intend to study the program in person in Australia. Please indicate your mode of attendance below:

I will be attending in person. By indicating I am attending in person, I acknowledge I will be required to enrol full-time* in courses with an in person mode of delivery as outlined on the [Programs and Courses](#) website and will ensure I comply with the conditions of my visa.

The ANU will issue you an electronic Confirmation of Enrolment (eCoE) after you complete and email the personalised Acceptance & Payment Advice form attached to your offer letter to acceptance@anu.edu.au and upon receiving your tuition fee deposit.

I will be attending online. By indicating I am attending online, I acknowledge I may study full-time* or part-time* and will be required to enrol in courses with an online mode of delivery as outlined on the [Programs and Courses](#) website and that part-time study will extend the length of time it takes to complete the program.

Students studying the online version of the program are not eligible for an electronic Confirmation of Enrolment (eCoE) that is necessary for a student visa to study in Australia.

Study Plan

The Graduate Certificate of Science Communication requires successful completion of 24 units (typically four courses). The list of courses that contribute towards the Graduate Certificate of Science Communication is available through the “Study” tab on the [Programs and Courses](#) website. To view information about individual courses click on the course code hyperlinks included in the list of courses.

The study plan below is a tool to help you discuss your course selection with the [Program Convener](#) and plan your enrolment. In most cases courses are offered once per year in the specified semester or non-standard session (Summer, Autumn, Winter, Spring) and this may limit course selection. The availability of courses as outlined on the [Programs and Courses](#) website is subject to change.

To view when a course is available and the mode of delivery ensure you have clicked on the course code hyperlink as noted above and then the “Class” tab. Please indicate your proposed study plan below and refer back to this information when completing the table:

	Course Code	Course Name	Semester/Session	Class Number	Mode of Delivery
<i>Example</i>	SCOM8014	<i>Communicating Science with the Public</i>	<i>Semester 1, 2023</i>	<i>3947</i>	<i>In Person</i>
Course 1					
Course 2					
Course 3					
Course 4					

It may be possible to make changes to your study plan in the future providing you will still be able to complete your study within the minimum duration required. Students attending in person must seek advice from [Student Services](#) before making a change to their study plan.

*A full-time study load is equal to 24 units per half year (typically four courses).

*A part-time study load is less than 24 units per half year (typically three courses or less).

To calculate your study load the first half of year includes Summer Session, Semester 1 and Autumn Session and the second half of year includes Winter Session, Semester 2 and Spring Session.
